2023 - Present

As an SEO specialist, I have a strong track record of conducting website audits to optimize a company's online presence. One of my key areas of expertise is off-page SEO, specifically building genuine backlinks to improve a website's search engine rankings. I have experience in a variety of link-building techniques, such as posting on forums, guest blogging, profile submissions, referral sites and other methods. Overall, my goal is to help companies improve their online visibility, boost their search engine rankings, and drive more traffic to their website.

Our clients have a smooth and enjoyable experience on their site. I have completed many such audits, and am well equipped to help organizations optimize their online presence.
